

Intermediate Kitesurf Course:

Our intermediate level kitesurf course is dedicated to all those who have achieved full independence in kitesurfing but who want to start raising their level and skills.

The intermediate course includes all the lessons that go from teaching changes of direction to rotations hooked in back and front.

All the lessons will be followed and carried out personally by Giacomo Barberi.

Before entering the water and trying out what you want to learn, Giacomo will give you a first theoretical description of what you are going to do, then he will personally show you the trick several times in order to let you see the exact execution of the same and to comment on any critical points or common mistakes to avoid.

Only at this point, equipped with radio helmet you can try and try again your desired trick always under the watchful eye of Giacomo who will always be in touch with you via radio and will give you instructions in real time before, during and after the execution of the trick.

During the intermediate course the most common requests from the kites are to learn: Turns, jibing, pop hooked, jumps with inversion of the kite, toeside, riding blind, backroll, frontroll, darkslide and the first hooked kiteloops.

These are just some examples of what you can learn with intermediate lessons and we guarantee that with the possibility of being followed by a professional, you will be amazed at the speed with which you will achieve the pre-set results.

Do not hesitate to contact us for more information or to resolve any doubts you may have.

[We wish you a great and windy.](#)
